Document Summary

This document highlights the main characteristics and the functionality of the HSSL website; an online system providing client-focused solutions to personal, business and corporate organizational problems. Drafted Case Study is analysed by the Fullestop Sales team in detail. It intends to draw a word picture of the study of HSSL Website.

Case Study of HSSL emphasize on encompassing the various development and functional aspects developed by the Fullestop. It develops a background for the understanding of the main reason for the development of this website. This document contains analysis of the HSSL System implementation for providing high performance solution to the client.

Objective

Fullestop was intended to develop an online system which provides consulting services, pioneering strategic advice and practical solutions to corporations, businesses and individuals while saving their money and time in the process. The main objective behind the website was to facilitate the users by serving them innovative solutions related to their requirements which prove beneficent to them.

It was focussed that information or directions being looked for by the visitors was swiftly available with ease. The system would provide information and directions to the visitors in an elegant way where he can find himself connected to the system. The main emphasize was placed on providing end users a rewarding experience saving their precious time and money while considering, reviewing and engaging businesses.

The system would be fully responsive so that users can easily navigate the website on any device. The website would be developed in such a way that provides an easy layered and faceted navigation along with a great look and feel to the users.

Synopsis

HSSL is a system developed by Fullestop which will facilitate the users and businesses by providing them solutions related to different laws & judiciary system, consulting services, documents such as: personal, business, corporate and different packages. It allows users to view latest news and event calendar.

The system is integrated with the multisite feature, i.e., containing multiple sites as a part of whole HSSL system. These are the key modules of the HSSL system. Following are the sites which system contains:

a) Ask a Lawyer

URL - <http://demoe3.com/hssl/ask-a-lawyer/>

Ask a Lawyer is a platform which enables users to get information about the legal things and ask a question for the legal help from a lawyer. This system allows users to list their firm by adding attorney profile and practice info to get leads. This system also provides some legal guides and resources. Lawyer's directory is present there to get information about the lawyer. The system categorizes all the questions asked and lists them.

b) Buy Sell Biz

URL - <http://demoe3.com/buybusiness/>

Buy Sell Biz is the system providing platform for users to buy or sell business/assets/commercial properties in different categories. This allows users to search for a business with some search criteria and then lists the businesses available which are added from the system backend. It also lists the commercial properties and allows setting an appointment to view the property. It enables users to enquire about investors and see the details of the assets available. This system allows users to subscribe for HSSL alerts to get updates via email.

c) Get EZ Quotes

URL - <http://getezquotes.demoe3.com>

"Get EZ Quotes" is a system which provides a platform to the users to post projects / jobs and get quotes from the service providers to get their project complete as per their requirements. This system featured 2 kinds of users: one is customer who posts the projects and other is service providers who quotes on the projects and provides services once awarded with the project by the customer and get paid once the job done. All the projects posted by users are listed in categories and sub categories.

Technologies Used

Following are the technologies, which Fullestop used in the development of HSSL website:

- **HTML 5/ CSS:** For development of user interface.
- **JavaScript/ JQuery/ AJAX:** Client side scripting for incorporating additional features like validations, carousal and page transitions.
- **Word Press:** Open Source CMS (Main website-HSSL and Ask a lawyer module)
- **Cake PHP:** Open source Web Application Framework (Buy Sell Biz and Get EZ Quotes module)
- **Apache:** Web server
- **MySQL:** Database server for storing and fetching website data.

Result
